EDUCATION

Binghamton University, State University of New York, School of Management

Bachelor of Science in Accounting

May 2018

PROFESSIONAL EXPERIENCE

Lunchbox

New York, NY (Remote)

Web Solutions Engineer

February 2021 - Present

- Create responsive web environments using React/JS/CSS including dev and production builds with CI.
- Assess and troubleshoot 15-30 basic tickets per week including bugs, client front-end improvements in json/CSS, ftp with AWS, or DNS management.
- Bridge technical gap between engineering and customer success along with joining client video calls to explain technical concepts and find creative solutions to their product struggles.

Chip NYC

Astoria, NY

E-commerce/Wordpress Developer + Digital Marketing/SEO

October 2018 - February 2021

- Design and manage projects at a growing startup, mainly e-commerce and restaurant tech implementation.
 - Lead the creation of our e-commerce division working with in-house product designers, including implementation of a figma wireframe using WordPress, Javascript/HTML/CSS, Stripe integration.
 - Used integrations to enable other teams for operational success including automated shipping/labeling, HR solutions on site, and custom shipping location and timeframe needs.
-

PROJECTS - [Github Profile](#)

Starcatchers - [Github](#)

New York, NY (Remote)

Co-Founder/Frontend Engineer

December 2021 - May 2022

- Created and maintained a react based web app with web3 functionality, including use of react hooks, context api, CSS/stitches with full responsiveness and mobile UI.
- Web app setup included managing DNS, CI with gitlab, cloudflare setup and GCP management to ensure a peak visitor count of ~100k users could be handled.

GymHop LLC - [Github](#)

Melville, NY

Co-Founder/Frontend Lead

October 2018 - November 2021

- Created a new type of gym membership that allows users to access multiple independent gyms.
 - Lead a team of 3-4 react developers including work/ticket assignment, peer reviews and git management.
 - Self-taught JavaScript/React Native in order to assist in creating a check-in app including libraries such as redux, context, Stripe.js along with use of Xcode and Android Studio to publish the mobile application.
-
